Jean Lalonde:

I'm an Instructor at the Operating Engineer OETIO, and we're going to teach you about the TLB today and we're going to talk about the technique and procedure. Let's get to it!

We enter a montage of the TLB in action. It showcases the TLB moving earth from a variety of angles. It also demonstrates Jean's dexterity as he navigates a payload through a small obstacle course. The video finishes with a wide shot of the TLB parked.
